

**Project:** Our product has a front facing user portal (called Candy). This currently supports approx. 8 different languages. Your task is to add the support of Hebrew – a right to left language.

- 1) Add Hebrew as an available language in the system and in the drop down. You may use Google Translate to set the language – we will have it professionally translated at a later date.
- 2) Add support for RTL, Material UI supports a RTL flag, this will need to be enabled should a RTL language such as Hebrew be selected. In the future we may add additional RTL languages such as Arabic.
- 3) Your task then is to ensure the forms look and behave as expected. Labels, fields, validation, drop downs, popup modals etc should behave as expected.

## Left to Right

**NAYAX KYC Form**  
As a regulated European Payment Institution we are obliged by anti-money legislation (AMLA EU directive) to gather information from you, the client. To do this, we need to identify you, and gather the additional information described below. Please be assured your information is held securely at all times, in accordance with GDPR, and is not shared in any way other than for the purpose for which it was gathered.

**Know Your Customer**

1 About You 2 Your Company 3 Related Individuals 4 Data Security 5 Confirm Identity 6 Finished

**Information about you...** Help on this section
