# POINT 1: MODIFY THE VIEW

- Now it displays all the old tickets
- When I need to see old comments
- I need to squeeze it and a new page opens for me. I don't want this
- I want when pressed on it to show all the old comments and he can add a reply as well
- When you are done, I need to press ticket A drop-down list appears in all old comments He can also add a response ex: steven type > test same img As shown in my html edit
